ITEM 4**(8x0.5 = 4 MARKS)**

Match each underlined word (1-8) with the part of speech (a-m) which describes it. There are five (5) parts of speech you do not need to use. Write your answers in the table below.

A strikingly (1) large number of children - more than 260 million worldwide - are out of school, while (2) more than half of those in education are not learning, a recent study by World Bank has warned. The global push to ensure free primary and secondary education by 2030 has helped fuel (3) a “trade-off of quality for quantity”, whereby (4) children are spending several years in school yet remain unable to read, write or do basic sums, according to Jaime Saavedra, who (5) leads the global education practice at the bank. The Global Partnership for Education – a multilateral (6) organisation comprised of governments, foundations, and private donors – is also expected to push poorer countries to increase their domestic education expenditure to 20% of the national budget. Despite (7) a universal pledge to ensure free primary and secondary education by 2030, governments are largely failing to address adequately issues associated with learning (8), namely the cost of uniforms, transport to and from school, and lodging, activists claim.

Match the underlined mistakes (1-6) in the text with the types of errors listed a-i. There are three (3) types of errors you do not need to use.

Write your answers in the table below.

The Eurydice network of the DG Education of the European Commission has now published its report on *Citizenship Education at School in Europe*. One of the main finds (1) of the report is that in most European countries national curricula tends (2) to be broad in scope regarding the four competencies: Communicating efficiently (3) and constructively with others; thinking critically; acting in a socially responsive (4) manner; and acting democratically. The report also states that “Nearly half of the EU countries still have no regulations and (5) recommendations on the development of prospective teachers' citizenship education competences threw (6) initial teacher education”. Another cause for concern is the lack of provision of citizenship education to students in school-based initial vocational education and training.

Distance Learning: How Will We Get Through This?

Par. 1 Teachers and parents are scrabbling through a toolbox of teaching and parenting techniques, looking for the right tools to help them with managing students during this time of uncertainty. Too many are coming up empty-handed in this new world of distance learning. Teachers have been forced to abandon the classroom management tools they are accustomed to. They are speaking words into cyberspace, and with cameras turned off there is no assurance that they are reaching listening ears.

As a result, they are baffled and providing instruction without a firm grasp on student focus becomes an **exigent** task.

Par. 2 Alternatively, although parents are not required to actually tutor their children, they have been forced to become involved in classroom management. They are suddenly responsible for keeping their children accountable for their schoolwork and behaviour, and many are doing this for multiple children at different grade levels and for teachers of various teaching styles.

Par. 3 Educators desperately want to help these parents but feel cut off from their students and familiar resources. Parents are eager to step up to the plate but have no idea how to swing the bat. What if there was a way to combine tried-and-true classroom management tools with parenting techniques, giving all stakeholders a new toolbox to rummage through?

Par. 4 After one year of teaching in a virtual classroom from home, I have come up with new tactics that mesh classroom-style management with parenting skills to have focused kids who got their work done on time. (Some days were better than others, but that's true for parents and teachers alike.) Here are some of the tools I found that helped me as a parent-teacher, as well as some ideas I've shared with learning coaches when they sometimes struggle to be the teacher-parent.

Par. 5 There are no longer bell schedules and no 50-minute blocks of time to neatly fit in a lesson so, instead, time-blocking can be used. Sharing this tool with your students' parents can make an impressive difference as it helps them make the most out of what they have available. Time-blocking is the method of setting aside a chunk of time for a particular task. First, make a list of tasks, then determine how much time each task generally requires. Schedule in required activities (live class sessions, lunch break, doctor's appointments, etc.), then fill in the rest. This is something teachers can model for parents in a short email or video. Keeping the schedule flexible makes it easy to accomplish daily goals as well as squeeze in a five-minute task here or there, as needed. Those tend to pop up throughout the day. Setting timers can really help with this tool.

Par. 6 The days of anticipating a class party, the movie day after finishing a novel, or the spontaneous outdoor game of dodgeball have vanished (for now). This is where parents need the most help—taking a break! Fun activities to suggest to your students' families could include a weekly family movie or game night, scavenger hunts (teachers can provide a list of items and align them with lessons), and outdoor game time. Encourage parents to do this regularly to ease tensions, especially when tensions seem the highest.

Par. 7 Veteran teachers know the value of silent activity stations and pre-planned transitional activities. Yet they often experience physical and emotional **prostration** caused by excessive stress. At this time in our educational history, parents are just as likely to suffer from it as teachers as they struggle to jump their children from one task or virtual meeting to another. Remember to make time for yourself and *stick to it*. As a

home-schooler and full-time teacher, this is a tough one for me. The days I do it are measurably better for myself and my kids.

Par. 8 Teaching is *hard*. Parenting is *hard*. It's refreshing to know that instead of floundering on your own, you can reach out and help each other. I know you have more ideas and tools in your trusty old toolbox than I have offered here, so take your favourite parenting tricks and mix them with your favourite teaching techniques. Share your expertise with your students' parents and don't forget to apply it to yourself, your children, or your family and friends. The best answer to the question, "How will we get through this?" is, "Together, although we're apart." Share ideas, resources, and tools to make distance learning more manageable and less stressful for *all* stakeholders and we'll all reap the benefits as the future unfolds.

Par. 9 I believe that there is strength to collect from any perceived weakness. Right now, the weakness lies somewhere in our fears about providing quality education, but I predict that the strength to come will be students' increased abilities to manage their time, take ownership, and begin to seek out learning for its own sake.

ITEM 8**(10 MARKS)****A. Write the word that best fits in each gap in the table below. (10x0.5 = 5 marks)****The Use of the Common European Framework**

The Common European Framework (CEFR) is intended to overcome the _____ (1) to communication arising from the different educational systems in Europe, by providing a shared basis for reflection and communication among the different partners in the field. It is offered to users as a _____ (2) that allows them to think carefully about their decisions and practice, and to situate and co-ordinate their efforts, as appropriate, for the _____ (3) of language learners in their specific contexts. One thing should be made clear: the CEFR does not _____ (4) out to tell practitioners what to do, or how to do it. It raises questions but doesn't provide ready-made answers. It is not the function of the CEFR to lay down the _____ (5) that users should pursue or the methods they should employ. The CEFR should thus be _____ (6) to the specific context of use – a fundamental aspect fully reflected in the level system which can be exploited flexibly. Nonetheless, this does not mean that the Council of Europe is _____ (7) to these important issues. Indeed, a number of specialists who have _____ (8) to language policy projects have put a great deal of thought and work into the theory and _____ (9) of language learning, teaching and assessment over the years. The publication marks a crucial step in the Council of Europe's _____ (10) with language education, which seeks to protect linguistic **and cultural diversity**.

Factors Contributing to Truancy Among Secondary School Students

Truancy among students has become an **1. ____ (EMERGE)** problem. It is any intentional, unauthorised or **2. ____ (LAW)** absence from compulsory schooling. Globally, truancy has been regarded as a cankerworm that has eaten deep into the fabric of our educational system and has caused a lot of **3. ____ (SET)** for secondary school students in their educational pursuits. It leads to potential delinquent activity, social isolation, or educational failure via suspension, **4. ____ (EXPEL)** or dropping out.

Research reveals that there are a number of **5. ____ (PREVAIL)** causes of truancy among students. Leading contributory factors include illness, age, **6. ____ (JOB)**, social class and geographical area. Researchers have also found that institutional factors like teachers' attitude, **7. ____ (EFFICACY)** administration and high cost of education are **8. ____ (CONDUCE)** to truancy as well. During the course of their study into the causes, views and traits of school absenteeism and truancy, the researchers demonstrated that peer group, relations with teachers, curriculum design, family background, and **9. ____ (TREAT)** are also factors that affect attendance. Further, they established that truancy is similar to absenteeism, but truancy is **10. ____ (EXCUSE)** absenteeism from school without the permission of parents, who are often unaware of their children's truancy.

... most of the time we were awake, while we were growing up, we spent in the kitchen. Until we married or ran away, it was the common room we all shared. In it, we lived and ate in the thick air of crowded family life; we didn't mind the little space; we trod on each other like birds in a nest, pushed past each other without unfriendliness, all talking at the same time or all silent. But we never, I think, felt overcrowded, because we were as separate as the notes of a piano.

That kitchen ... was untidy, warm and low. Its muddle of furniture seemed never the same; it was moved around every day. Coal and sticks of beech wood crackled in a black fireplace and stove; towels hung to dry on the fireguard; the mantel-piece above the stove held an untidy collection of fine old china and potatoes of unusual shape. On the floor there were strips of muddy matting; the walls supported stopped clocks and picture postcards. There were six tables of different sizes; some armchairs with their insides bursting out; boxes, books and papers on every chair; a sofa for cats, a small organ for coats, and a piano for dust and photographs.

B. You are given a lesson plan about the benefits and drawbacks of school and work. Fill in the missing stages from the options listed a-f to complete the lesson plan. Write your answers in the numbered spaces provided.

(6x0.5 = 3 marks)

Missing stages

- a. Students read the article and answer comprehension questions in their groups. They compare their answers and announce them to the class.
- b. Students look at a picture of a teenage boy, named John, read the title of the article about him as well as the questions a journalist asked him.
- c. Students practise on the comparative structure by completing a gapped text.
- d. Students read some personal views of people who work and are asked to identify the ones they agree with.
- e. Students skim through the passage and highlight the boy's answers to the journalist.
- f. Students act out the interview based on the article they have read.

Lesson plan

- The teacher holds a whole-class activity to brainstorm ideas on the benefits and drawbacks of being at school.
1. _____
- Students discuss in groups whether attending school has more advantages than going to work.
2. _____
- Students make predictions on the content of the interview.
3. _____
- Students check their answers in groups while the teacher monitors.
4. _____
- The teacher divides the groups into pairs, allocating the role of John and the journalist.
5. _____
- The teacher elicits some of the benefits and drawbacks brainstormed at the beginning of the lesson and writes them on the board.
6. _____
- Students produce a for and against essay about school and work.

ITEM 14

The text below was written by a learner in an upper intermediate (CEFR B2) level class in response to the following task:

You recently stayed at an unusual hotel while on holiday.
Write an email to a friend, telling him/her about your experience.
In your email, you should:

- explain what was unusual about it
- talk about what you did there
- say how the experience made you feel.

Your email should be between 150 and 200 words. (15 marks)

Dear Mike

Im writing this email to you to tell you about the unusual hotel i stayed at recently. The hotel was completely underwater and you can see all the fish swimming around it. Its all built by strong glass that cant be easily broken by a human or a fish by hitting it too hard.

Each room has its own type of fish to swim through the glass panel that you can also feed by pressing a simple red button that drops food for the fish to eat. The hotel has some night activities with fish that glow in the dark. When its night you can go to the middle of the hotel and see the glowing fish dancing in circles. It can be both scary and unique because there are rooms that theres no light in them and its pitch black. In the end the experience I had was different from anything else I ever had. It was a-once-in a lifetime experience and I would like to go there again and I suggest you come too since you like fish so much. I'm looking forward to hearing from you soon.

Your dear friend,

Stelios

You have been observing colleagues assessing speaking activities.

A. Below is part of the transcript of a student's oral activity. According to CEFR levels, which level has the speaker achieved?

Teacher: In this part of the test, I'm going to give you two photographs which show people who are helping each other. I'd like you to talk about your photographs for a minute and say how important it is to help in these situations.

Student: I think in the first picture it's ... someone helping a soccer player because he's obviously hurt. Em ... and in the second picture the police officer is helping. I think, it must be a tourist because there is a map in the picture and I think she is probably lost ... Tourists often lose their direction ... It's really important to help people in those situations because em ... they are both em ... in ... they both needed help. In the first picture, the person is probably in pain ... because mostly when you play a sports you can get injuries. And in the second photo, I think it's also very important that the police officer is willing to help the tourist because em ... Well, I mean ... they are police officers are ... are there because after all, they have to serve the people.

Teacher: Thank you.

B. The following extract from a student’s authentic writing contains three (3) different types of mistakes. Find and correct the mistakes, making clear what specific type of mistake each one is. Write your answers in the table below.

(3x1 = 3 marks)

I can remember the first time I met Mr. Smith; it was a crisp Monday morning on the assembly hall stage. He swept in with his big, black gown behind him. The guy meant business. He looked at us from behind his huge, black glasses for a few minutes. I was frightened out of my brains. It was more than two decades ago. Still, I can remember him clearly; the closely cropped curly hair, the bushy eyebrows, the cruel, tight mouth. I remember how intimidated I was at that first meeting. The man gave me the crips. The more I got to know him, the more I saw him as the *execrable* dragon of childhood tales.

ITEM 17**(4x0.5 = 2 MARKS)**

Match the problems (1-4) in students' essay writing with the teachers' support strategies (a-f). There are two extra support strategies you do not need to use. Write your answers in the table below.

PROBLEMS	SUPPORT STRATEGIES
1. Learners may not be able to use the appropriate register in their writing.	a. Provide learners with drills on punctuation techniques.
2. Learners' writing may show no signs of interconnectedness.	b. Provide an example of using questions once or twice in their writing to maintain coherence.
3. Learners may demonstrate simplicity in their writing.	c. Have learners choose conjunctions from a list of options to fill in gaps in a text.
4. Learners may make use of run-on sentences.	d. Exemplify the effect of idiomatic expressions in a passage.
	e. Ask learners to group expressions according to different levels of formality.
	f. Provide them with options of linguistically correct sentences to use.

1. ____ 2. ____ 3. ____ 4. ____

ITEM 18**(6x0.5 = 3 MARKS)**

Match the types of assessment (1-6) with the assessment tasks (a-f). Write your answers in the table provided.

TYPES OF ASSESSMENT	ASSESSMENT TASKS
1. Self-assessment	a. The teacher gets students to mark each other's work.
2. Portfolio assessment	b. The teacher asks the students to perform tasks that resemble authentic language in use (an interview, a critical essay etc.).
3. Continuous assessment	c. The teacher observes the learners as they learn and evaluates them from the data gathered in the course of a lesson.
4. Peer assessment	d. The teacher facilitates students with the collection of samples of their work (essays, projects etc.) which show growth over a specific period of time. The teacher uses scoring guides and rubrics for the assessment.
5. Informal assessment	e. The teacher asks students to record themselves during a speaking activity. Then the teacher asks every student to listen to himself/herself and to reflect on strengths and weaknesses.
6. Direct assessment	f. The teacher assesses aspects of the learners' language throughout the course and then produces a final evaluation result from these assessments.

1. ____ 2. ____ 3. ____ 4. ____ 5. ____ 6. ____

ITEM 19**(5x1 = 5 MARKS)**

Write the level of cognitive thinking skills in Bloom's taxonomy each activity rationale belongs to.

ACTIVITY RATIONALE	LEVEL
<p>Example: The multiple-choice test will allow the teacher to see whether students can exhibit memory of previously learnt material by recalling fundamental facts and basic concepts.</p>	<p><u>Remembering</u></p>
<p>1. In doing this assignment, learners will transfer the main character to a new setting and consider the implications of his actions beyond the consequences shown in the play.</p>	<p>_____</p>
<p>2. Through this assignment, learners will be able to decide whether the main character in the play should have acted the way he did, leading them to make judgements about the validity of his decision making.</p>	<p>_____</p>
<p>3. Through this activity, learners will restructure the roles of the main characters to produce new outcomes in the story. This will allow them to use and develop their imagination, showing a full understanding of the writer's techniques.</p>	<p>_____</p>
<p>4. Writing a summary encourages learners to think about what the most important parts of a piece of literature are, and to decide which aspects of the plot to discard in favour of being concise. This allows teachers to determine whether students have grasped the main idea of the play.</p>	<p>_____</p>
<p>5. Through this assignment, as learners consider what makes each character an antagonist or a protagonist, they examine and break information into parts by identifying motives or causes. They use their critical thinking skills to make inferences and find evidence to support generalisations.</p>	<p>_____</p>

ITEM 20

(4X0.5 = 2 MARKS)

Match the teacher's instructions (1-4) with the strategies (a-f) they are helping learners to develop. There are two extra strategies you do not need to use.

Write your answers in the table below.

1. Use post-it notes to write one thing you learned today and one question you have about today's lesson.
2. Use question marks to highlight areas of uncertainty, stars to indicate anything that seems important and exclamation marks to indicate a key turning point in the plot.
3. Write down everything you can remember from memory. Afterwards go back to your textbook to verify that the information you produced is correct and check for any errors.
4. Read the text and form groups of four to recreate a scene from the text. Then, take turns to talk about the scene from the characters' own perspective.
