PART I: LISTENING SKILLS

(25 MARKS)

TASK 1

(10X1=10 marks)

You will hear the beginning of a radio broadcast about weather conditions in Britain. Listen and circle the correct word in brackets.

Global warming has made the news again and it's all because of this hot weather we're having. Britain is experiencing a heat 1. (wave / wind) this summer and it's causing numerous problems. It's difficult to 2. (walk / work). It's difficult to sleep. And it's causing 3. (wealth / health) problems too. It's not a little problem. It's serious. 100 people have died in the last few months. The weather is changing. Temperatures above 4. (thirty / thirteen) degrees are becoming more common. But it's not just here that temperatures are rising. The 5. (west / rest) of Europe is experiencing the hottest summer

in 115 years. The weather is getting warmer 6. (anywhere / everywhere) and in Antarctica the ice is melting. Experts say temperatures around the world are rising and we can expect them to continue to rise by about five degrees in the next 100 years. The 7. (earth / air) is getting hotter.

And there are other climate changes happening around the world. We've heard about the floods in India and the fires in the United States. In the South Pacific, there were more 8. (cyclones / stones) this year than last year. And they're getting bigger.

So what's causing all this? Are these changes due to global warming? Are we causing these problems? Some experts say temperatures are rising because we are causing too much pollution. Others say it is part of a natural 9. (circle / cycle) and we aren't doing anything to cause it. Either way, what can we do about it? These are the 10. (topics / trophies) we'll be discussing on the programme today.
