

## About the association

The Cyprus Chiropractic Association was formed in 1984. It is a member of the European Chiropractors' Union [www.ecuconvention.eu](http://www.ecuconvention.eu) and the World Federation Chiropractic's Eastern Mediterranean Region <http://www.wfc.org>

## CyCA Professional Statement

The Cyprus chiropractic association (CyCA) is committed to the highest levels of excellence in chiropractic education, patient care, standards of practice and continuous professional development.

Chiropractic is a primary contact healthcare profession, with its own distinct holistic principles and practice, specialising in the art of manipulation of the joints, largely hand alone, with a view to normalising neuro-musculo-skeletal function as it relates to the spine and to patients' health.

Chiropractors use neither drugs nor surgery, but refer to relevant specialists where appropriate. They are regulated by law, and practise autonomously within the healthcare community, promoting co-operative relationships with other healthcare professionals, both within and outside of the healthcare system, for the benefit of the patient.

Chiropractic scope is not defined by law. The Cyprus chiropractic association is committed to ensuring that this clinical freedom is retained within the parameters of good practice.

#### ABOUT OUR INITIATIVE

The Scotland College of Chiropractic Charitable Trust has been set up to drive forward the development of a new chiropractic undergraduate degree programme. There is a great demand for practice ready graduates in the UK and Europe, the College can help meet that demand. Establishing the College represents an opportunity to offer the first chiropractic programme in Scotland. The College is being developed with a clear mission to teach the science, art and philosophy of chiropractic in a contemporary healthcare context.

We invite you to contribute to the development of the Scotland College of Chiropractic. Click [here](#) to support through one of our fundraising initiatives.

#### OUR VISION

**“A healthier, happier humanity”**

#### OUR MISSION

**“To educate, empower and inspire great people to excel as Chiropractors”**

## Get Involved

If you are interested in the development of the College or considering a career as a chiropractor sign up to our mailing list for updates from the Trust. You can also find our latest news by clicking [here](#).

# Earn a Doctor of Chiropractic degree from Life University

Life University (LIFE) is home to the world's largest Chiropractic education program, with students consistently ranking in the top 10 in scores for the National Board of Chiropractic Examiners (NBCE). Life University chiropractic students investigate the processes of the human body in top-of-the-line facilities with unmatched resources. Students also achieve a thorough grasp of the theoretical groundings of Vitalism, the understanding that the body is a conscious, self-developing, self-maintaining and self-healing organism.

- Combine hands-on chiropractic training and chiropractic academic rigor to prepare for real-life practice, including how to establish a successful chiropractic entrepreneurial business
- Demonstrate an understanding of the history and accomplishments of the chiropractic pioneers in establishing chiropractic as a separate and distinct health care profession
- Learn to counsel chiropractic patients with regard to the restoration, maintenance and promotion of optimal health.
