

European Day of Languages School Year 2025-2026 Linopetra Gymnasium

Exploring European Languages

On the occasion of the European Day of Languages, celebrated annually on 26 September, students at the Linopetra Gymnasium were invited to work collaboratively or independently to create posters, leaflets, presentations, and other creative materials highlighting the traditions, cultures, and languages of various European countries.

The initiative was warmly embraced by both students and teachers. Through research, interviews, discussions, and interactive workshops, students explored the rich cultural heritage of Europe and gathered information to produce informative and visually engaging displays. Their work was then showcased throughout the school, allowing all students and staff to read, learn, and appreciate the diversity that characterises the European continent.

This experience helped students develop a deeper appreciation of the values that unite Europe, such as cooperation, solidarity, and mutual respect. Through exploring the traditions and languages of different countries, they also gained a greater understanding of and respect for each nation's unique cultural identity.
