

Peer-to-peer Social Awareness Seminars

School Year 2025-2026

TESEK MAKARIOS III NICOSIA

Health, Truth and Artificial Intelligence

Our school's participation, for the fourth consecutive year, in the English peer-to-peer seminar held on Friday, April 24, at the OELMEK offices, was a unique and highly creative experience for our students.

The seminar was based on the philosophy of collaborative learning, where students themselves take an active role in the learning process. Through presentations and open discussions, the participants developed communication, critical thinking, and teamwork skills.

In this event, our school was proudly represented by three groups, presenting modern and highly current affairs. The first group presented the topic 'Filtering the Truth', focusing on teenagers and smoking, and on how this phenomenon can be reduced or even eliminated. The group consisted of the students: Minas Minas, Stavros Theodorou, Stavros Panteli, Omar Said, and Dimitris Stavrinou (ΘΗΨ2β), under the supervision of Mrs. Eliana Kyrmizi. The second group worked on the topic 'Disinformation', highlighting the dangers of misinformation. The participating students were Petros Iosif (ΘΔΜ2β) and Christos Siakallis (ΘΗΥ2), under the supervision of Mrs. Mariantzela Pishili. The third group presented the topic 'AI in Education', examining the role of artificial intelligence in the modern educational process. The group included the students Mixalev Panchev Panagiotis (ΕΓ3), Anastasia Tengeri (ΕΓ3), and Abigail Thrasyvoulou (ΕΔ3), under the supervision of Mrs. Dimitra Aristodemou.

We are especially proud of the overall effort and presentation of our students, who represented our school in the best possible way.
