## PASSAGE 2

Read the passage about graffiti and do TASK 4 below.

### GRAFFITI

The term **graffiti** comes from the Greek word “grafein” which means “to write”. People started drawing and painting on walls thousands of years ago. Prehistoric people painted on the walls of caves, and those paintings are now important works of art. Graffiti first appeared in ancient Rome and Egypt.

Today, people draw on walls. However, this is not always considered art; it is called graffiti. Graffiti art takes a lot of forms: it can be something small and personal, like the initials of the artist, or something much larger, like a mural. Most graffiti

artists call themselves “writers” and they sign with spray paint or a marker. This signature is known as a “tag”. Groups of writers who are friends are called “crews,” and new “writers” are named “toys”.

Some artists use graffiti to express their personal lives, while others use it to express their artistic talent. The reason behind a piece of graffiti can be happiness or sadness, disappointment or relief. That is why it is a form of art which is very popular with young people nowadays.

Young people first became interested in graffiti in America in the 1970s. Now, people all over the world like it. In the beginning people saw it as vandalism, but now they try to understand what messages these works of art want to send.

Banksy is the name of a British artist who uses it to sign his work. His art appears on walls in streets all over the world for everyone to see. Through his graffiti, he expresses his feelings and sends messages about everyday life to the rest of the world.
